

Name of the School: All schools (SoT, SoS, SoM&LA)

Activity Summary / Report

- Branch: All Branches
- Title of the Program: A training and sensitization session for revising CO, PO, PSO and PEO and Mapping
- Date & Time & Venue: 19th & 20th January, 2026, SoT Auditorium, GSFC University
- Need for the Program:
To Sensitize the teaching faculty about the importance of Washington Accord and Graduating Attributes while framing the Course Objectives, Course Outcome, Program Outcomes and Program Specific Outcomes.
- Expert Name: Prof. R. Jayakumar, Dean-Academic Affairs
- Expert Details: Ph.D., GSFC University
- Faculty Co-Ordinator: Dr. Mihir Trivedi, Ms. Yoothika Patel
- Organized by: IQAC, GSFC University
- Objective:
 - To orient faculty members on the correct principles of framing Course Outcomes (COs) using the ABCD model in alignment with Outcome-Based Education (OBE) and NAAC requirements.
 - To create awareness about common errors in Course Outcome formulation, including the use of non-measurable, teaching-centric, process-oriented, and attitudinal verbs that violate OBE principles
 - To train faculty in the effective use of Bloom's Taxonomy for CO framing, emphasizing measurable, performance-oriented action verbs at appropriate cognitive levels .
 - To strengthen the logical alignment between Course Outcomes, assessment tools, and CO-PO-PSO mapping, ensuring validity and consistency in outcome attainment and evaluation
- Importance:
 - The session was crucial for improving the quality of Course Outcomes, which form the foundation of the OBE framework and directly influence student learning assessment
 - It addressed critical gaps in existing CO formulations, particularly the overuse of vague verbs such as "*understand*", which compromise measurability and accreditation compliance
 - The training reinforced the NAAC Criterion-1 requirement of clearly articulated, measurable learning outcomes, thereby strengthening institutional accreditation preparedness

Name of the School: All schools (SoT, SoS, SoM&LA)

- By emphasizing the ABCD model and the “Golden Rule” of COs, the session ensured better alignment between teaching, learning, and assessment practices, leading to academic fairness and transparency

o Glimpses of activity:

o Outcome:

After successful completion of the course:

- Faculty members acquired the ability to frame clear, concise, and measurable Course Outcomes using the ABCD model and appropriate Bloom’s Taxonomy action verbs.
- Faculty members were able to identify and eliminate non-measurable and teaching-centric verbs from existing Course Outcomes, ensuring compliance with OBE and NAAC standards.
- Course Outcomes were reframed to reflect demonstrable learner capabilities rather than syllabus coverage, improving their direct linkage with assessments such as exams, labs, assignments, and projects.
- Improved consistency was achieved in CO–PO–PSO mapping, with mapping strengths aligned to the cognitive rigor of the Course Outcomes, thereby enhancing the credibility of outcome attainment analysis.
